

## COINCOMPASS UPDATES

### Summary of PSA

## Trezor Wallet: Upgrade. **Action Required**

An upgrade to Trezor has been released (firmware 1.6.1).

CoinCompass is recommending that anyone with a Trezor Wallet who **access it regularly** installs this upgrade by:

- Ensure you have your recovery seed on hand
- Go to <https://wallet.trezor.io/#/> and follow the update instructions on screen, or
- for more detailed instructions and info about the update visit:  
<https://blog.trezor.io/trezor-one-firmware-update-1-6-3-73894c0506d>

## Trezor Wallet: New Feature.

Trezor announced that you can use the Wallet itself now to exchange your one cryptocurrency for another without logging into an exchange.

What Trezor has done was create a shortcut to certain exchanges. You will be able to sell your bitcoins directly from your Trezor wallet to an exchange a different cryptocurrency. It is not an atomic swap but a trade. CoinCompass does not advise you use this service because you're exposing your Trezor Address.
